

BPENVELOPE v1.1

BY NOISS COKO

II USER MANUAL II

DESCRIPTION

This device works as an envelope, defining transitions between the current and a target bpm. BPENVELOPE allows to increase or decrease Live's global tempo, being a very useful tool to use during live sets.

FEATURES AND FUNCTIONS

GO!

Triggers the envelope and starts the transition.

END

Sets a target bpm.

HOLD

The envelope will be triggered after a certain amount of time, once the "Go!" button was pressed. This time is defined by the Hold value.

TIME

Sets the transition time between the current and the target bpm.

MONITOR

Displays the global tempo.
